

Valley Health Lab Services

We are pleased to announce discounted rates for laboratory services provided at the Warren Memorial Hospital Community Safety & Wellness Expo on Saturday, April 27, 2019, at Warren County High School. Staff from Valley Health Laboratory Services will perform blood collections beginning at 8 A.M. Vouchers will be offered for purchase at the Expo if you choose to have the specimen collected on a different date.

In addition, vouchers may be purchased at the WMH Business Office March 1 – April 30, 2019. You may redeem these vouchers either at the Wellness Expo or you may come to the WMH Laboratory on a different date. For your convenience, the WMH Laboratory is open weekdays from 6 A.M. to 6 P.M., with extended hours on Thursday evenings until 8 p.m. and on Saturdays, 8 A.M. to 12 P.M. Vouchers are redeemable through June 30, 2019.

We will be offering the following blood tests at discounted rates:

- **Community (General) Wellness Panel \$45**
Complete Blood Count (CBC), Comprehensive Metabolic Chemistry Panel (CMP), Lipid Profile, and Thyroid Stimulating Hormone (TSH) – see *back for test descriptions*
- **Prostatic Specific Antigen (PSA) \$15**
Measures the level of prostate specific antigen, a protein produced by the cells of the prostate gland. This test has been approved to detect prostate cancer and other abnormalities in males.
- **C-Reactive Protein – high sensitivity (hsCRP) \$15**
Used to predict a person's risk of cardiovascular disease
- **Vitamin D \$20**
Determines the level of vitamin D. Low levels of vitamin D can result in a decrease in bone density and muscle weakness.

- **Vitamin B12 \$20**

Determines the level of vitamin B12. B12 is important for keeping the body's nerve and blood cells healthy. Low levels of B12 may lead to more serious health issues including anemia.

- **Hemoglobin A1C (HgbA1C) \$20**

Determines the average blood glucose levels over the past two to three months and used to diagnose diabetes and to monitor diabetic patients.

CBC – A complete blood count (CBC) gives important information about the kinds and numbers of cells in the blood, especially red blood cell, white blood cells, and platelets. A CBC helps your doctor check symptoms such as weakness, fatigue, or bruising, you may have. A CBC also helps him or her diagnose conditions, such as anemia, infection, and many other disorders.

Comprehensive Metabolic Panel – A comprehensive metabolic panel is a blood test that measures your sugar (glucose) level, electrolyte and fluid balance, kidney function, and liver function.

Lipid Profile – A lipid profile is a series of tests that measures the amount of the different types of cholesterol – low density lipoproteins (LDL), high density lipoproteins (HDL) and triglycerides in your blood.

TSH – A blood test used to check for thyroid gland problems.

Please note fasting may be required.
